PROFILE

Computer Science Engineering undergraduate with strong DSA fundamentals and hands-on experience in MERN stack development, distributed systems, and real-time applications. Proficient in C++, Java, and Python, with practical exposure to system design, cloud deployment, CI/CD automation, and scalable backend development.

EDUCATION

Chandigarh University, Mohali, Punjab B.E. in Computer Science Engineering CGPA: 7.61	2022 - 2026
Marwari College, Darbhanga, Bihar BSEB Intermediate Percentage: 86.2%	2019 - 2020
Vidyapati High School Bisfi, Madhubani, Bihar BSEB Matriculation Percentage: 70%	2017 - 2018

PROJECTS

Scalable E-Commerce Platform with AI-Driven Recommendation Engine | GitHub

Tech Stack: MongoDB, Express.js, React.js, Node.js, Redux, JWT, Python, Scikit-learn

- Built a MERN-based e-commerce platform with secure authentication, product catalog, cart, and order management.
- Developed an AI-driven recommendation engine using Python and machine learning for personalized product suggestions.
- Designed scalable RESTful APIs and optimized database queries for performance, security, and efficient data handling.

Distributed URL Shortener with System Design and High Availability | GitHub

Tech Stack: Node.js, Express.js, MongoDB, Redis, Base62 Encoding

- Designed and implemented a distributed URL shortening service focusing on scalability, low latency, and high availability.
- Used Base62 encoding for generating short URLs and Redis caching to improve response time under high traffic.
- Applied system design principles such as rate limiting, fault tolerance, and horizontal scalability.

Real-Time Chat Application using WebSockets and Event-Driven Architecture | GitHub

Tech Stack: React.js, Node.js, Express.js, WebSockets (Socket.IO), MongoDB, Redis

- Built a real-time chat application supporting instant messaging using WebSockets and an event-driven backend architecture.
- Implemented user presence, message persistence, and real-time updates using MongoDB and Redis.
- Ensured low-latency communication and scalable message handling for multiple concurrent users.

Automated CI/CD Pipeline with Cloud-Based DevOps Workflow | GitHub

Tech Stack: GitHub Actions, Docker, Node.js, AWS EC2, Nginx

- Built an automated CI/CD pipeline to build, test, and deploy MERN stack applications using GitHub Actions.
- Containerized applications with Docker and deployed them on AWS EC2 with environment-specific configurations.
- Improved development efficiency through automated deployments, version control integration, and rollback mechanisms.

TECHNICAL SKILLS

Languages: C++, Java, Python, SQL

Backend: Node.js, Express.js, REST APIs

Frontend: HTML, CSS, JavaScript, React.js

Database: MySQL, MongoDB

Tools: Git, GitHub, Docker, AWS, VSCode

CERTIFICATIONS

- Data Structures and Algorithms Specialization
- Complete Modern C++ Specialization
- Object Oriented Programming in Java Specialization
- Meta Database Engineer Specialization
- Google Data Analytics Specialization

INTERPERSONAL SKILLS

Problem Solving | Analytical Thinking | Communication | Team Collaboration | Adaptability | Curiosity & Willingness to Learn
