

AYUSH PALLAV PANDEY

Java Developer | Spring Boot | AWS

Secunderabad, Telangana, India | +91-8986273651 | ayushpallav7550@gmail.com | linkedin.com/in/ayushpandey-dev | github.com/ayush-pallavpandey

OBJECTIVE

Computer Science graduate specializing in Java backend development with Spring Boot, REST APIs, and MySQL, complemented by hands-on AWS deployment experience (EC2, Lambda, S3, IAM, VPC). Built and deployed applications with secure authentication and optimized data access, and quick to adopt AI-assisted engineering practices to ship reliable software faster. My goal is to create AI tools and application in java as it performed as a secured language and would prove more concise in updated version.

TECHNICAL SKILLS

Languages: Java 8+, SQL

Backend & Frameworks: Spring Boot, REST APIs, JWT Authentication, Multithreading, OOP, Exception Handling

Databases: MySQL, Schema Design

Cloud & DevOps: AWS (EC2, Lambda, S3, IAM, VPC, CloudWatch), Serverless Deployment, Docker

Frontend: HTML5, CSS3, Tailwind CSS

Practices: Problem Solving, Adaptability, AI-Assisted Development

PROJECTS

Pneumonia-Image-Analysis-In-Deep-Learning

Java, DL4J for image classification, Rag for embeddings

- Developed a prototype for classification of Pneumonia using X ray scanning.
- Java Spring Boot AI microservice that combines DeepLearning4J (DL4J) for image classification with a simple RAG architecture.

Cloud-Deployed To-Do App Tracker [LIVE](#)

Spring Boot, AWS (EC2, Lambda, CloudWatch), Tailwind CSS

- Built a serverless Java microservice on AWS EC2/Lambda with CloudWatch logging, enabling automated task execution without manual intervention.

AI-Assisted Book Management System [LIVE](#)

Java, MySQL, Tailwind CSS

- Designed and optimized RESTful APIs and MySQL schema/queries, reducing average query response time.
- Implemented JWT-based authentication and role-based access control (Admin/Staff) to secure API endpoints.

INTERNSHIP

Cloud Computing & Networking Intern

May 2024 – Jul 2024

BELTRON (Bihar State Electronic Development Corporation Ltd)

Patna, India

- Worked with enterprise firewall tools (Trend Micro, Checkpoint, BIG-IP F5, Forcepoint SEV) to support secure network infrastructure.
- Created disaster recovery documentation for virtual machines using Azure and VMware.
- Gained hands-on exposure to cloud infrastructure and networking environments, strengthening deployment fundamentals applicable to Java backend systems.

EDUCATION

Bachelor of Engineering, Computer Science and Engineering

Sept 2022 – Jun 2026

Chandigarh University, India

CGPA: 6.58/10.0

CERTIFICATIONS

- Oracle Java Foundations
- Advanced Java
- IBM Gen AI Prompt Engineering Basics
- NPTEL Cloud Computing
